### Benefits of Acupuncture

Acupuncture is a 3,000-year-old healing technique of Traditional Chinese Medicine recognized by the U.S. National Institutes of Health (NIH) for its safety and efficacy in treating a wide range of conditions. Acupuncture is used most broadly to relieve pain, to prevent, diagnose and treat disease, as well as to improve general health.

### Benefits of Chiropractic Care

The best prescription for an active healthy lifestyle is a properly aligned and functioning spine. Back pain and decreased mobility are the body's way of telling us something is not right. Chiropractic care can correct or even prevent these painful conditions.
